

Call for Papers:

Inaugural Joint Symposium of the Separation Science Subdivisions

255th National Meeting of the
American Chemical Society
New Orleans, LA March 18 – 22, 2018

*Sponsored by the Separation Science and Technology Subdivision
of the Industrial and Engineering Chemistry Division and the of Chromatography
and Separations Chemistry Subdivision of the of Analytical Chemistry Division*

The Separations Subdivisions of the Industrial & Engineering Chemistry and Analytical Divisions both focus on separation science research and development. These subdivisions serve as forums to discuss basic science, technology and method improvements and as an interface between chemists and engineers in the transition of laboratory and bench scale studies to industrial application. This inaugural joint symposium aims to promote a wide range of technical talks over all aspects of separations science.

Particular areas of interest include novel and new research in the following areas:

- Method development
- Separation compounds and systems
- Laboratory or industrial instruments and hardware
- Industrial separations needs and development

Organized by:
